Subject: MLPAComments: MLPA proposals.

After reviewing the information in the packages I believe proposal 2 best fits the goals and intent of the MLPA process and legislation. I believe it is time for us to take significant steps to protect the Central California coast with MPA's that will help regenerate coastal populations and improve the size and fecundity of the animals. This is only good stewardship of our resources and coastline. Decisions in the past were based on economic impacts only and consequently many fisheries have been impacted negatively. Proposal 2 gives us a very good chance to increase populations and ultimately make the fisheries more productive. Please support proposal 2. Thank you.
